

14 January 2010

The Honorable Tom Perriello
US House of Representatives
1520 Longworth House Office Building
Washington, DC 20515

Dear Representative Perriello:

I'm writing to thank you for your strong support of two issues that are incredibly important to me: making clean energy investments in America and addressing the urgent issue of climate change. Specifically, I wanted to thank you for being a champion on this issue and for your vote for the American Clean Energy and Security Act (ACES) this past summer.

My name is John Doe and my family and I have lived in Charlottesville for 16 years. As a small business owner who owns John's Jacuzzi's, I care a lot about our economy in Virginia. Personally, I believe that the next great job market will be in the clean technology field. We can take America in a new direction by making clean energy investments that will allow us to become the world's leading exporter of renewable energy. Not only that, but clean energy investments will help protect our future generations and our families from the devastating effects of climate change.

It is clear the majority of Americans want clean energy policies that reduce pollution, lessen our dependence on foreign oil, and create millions of new jobs. This legislation you supported provides a pathway toward meeting that goal in 2010. However, I know that there are some out there who play to people's economic fears and others who are misinformed about the bill you voted for, making it a politically difficult vote for you during tough economic times. Therefore, I wanted to personally write to thank you for supporting the ACES bill this past summer, and to ask you to continue to be a champion for clean energy issues and an advocate for strong action to fight climate change.

Sincerely,

John Doe
