

25 January 2010

Senator Jim Webb
United States Senate
248 Russell Senate Office Building
Washington, DC 20510

Dear Senator Webb:

I'm writing to ask you to support two issues that are incredibly important to me: making clean energy investments in America and addressing the urgent issue of climate change.

My name is John Doe and my family and I have lived in Crozet for the past 8 years. I recently read an incredibly disturbing statistic: that America spends an average of over \$1.2 billion to buy foreign oil every day. As a High School International Studies teacher, I know full well the impact that it has on our national security when we give enormous sums of money to oil regimes, like Iran, that aren't friendly to US interests. Not only that, but I am deeply concerned about the impacts that global climate change will have on my children's future. Therefore, I wanted to personally write to ask you to be a champion for clean energy investments and an advocate for reducing our dependence on foreign oil in America.

It is clear the majority of Americans want clean energy policies that reduce global warming pollution, and lessen our dependence on foreign oil. Passing strong clean energy and climate legislation this spring would provide a pathway toward meeting those goals. Please support strong clean energy and climate legislation this spring.

Sincerely,

John Doe
